

I am a very concerned XM listener. Hearing the issues about the local weather and traffic channels being stopped is a major concern for a PAYING XM SUBSCRIBER. In my job I do a lot of traveling in different parts of Florida and can not afford to put it on the local station and have to wait 5, 10, even 15 minutes to hear what the traffic is like in the area that I am in. This was one of them main reasons that I chose to get an XM radio in the first place. I don't think anyone in government or any other organization has the right to take away something that I "pay" a service fee to have. If the local stations have a problem with me not wanting to listen to 10 minutes of commercials before hearing something that I need to know the minute I turn the radio to that station, then they have a major problem. Leave XM radio alone!!
Concerned American,
Bryan Farmer.
